

Compression factor vs. decompression speed

Native RAM-to-RAM · 1 CPU core · median of 3 trials · original $\approx$ 100 MB

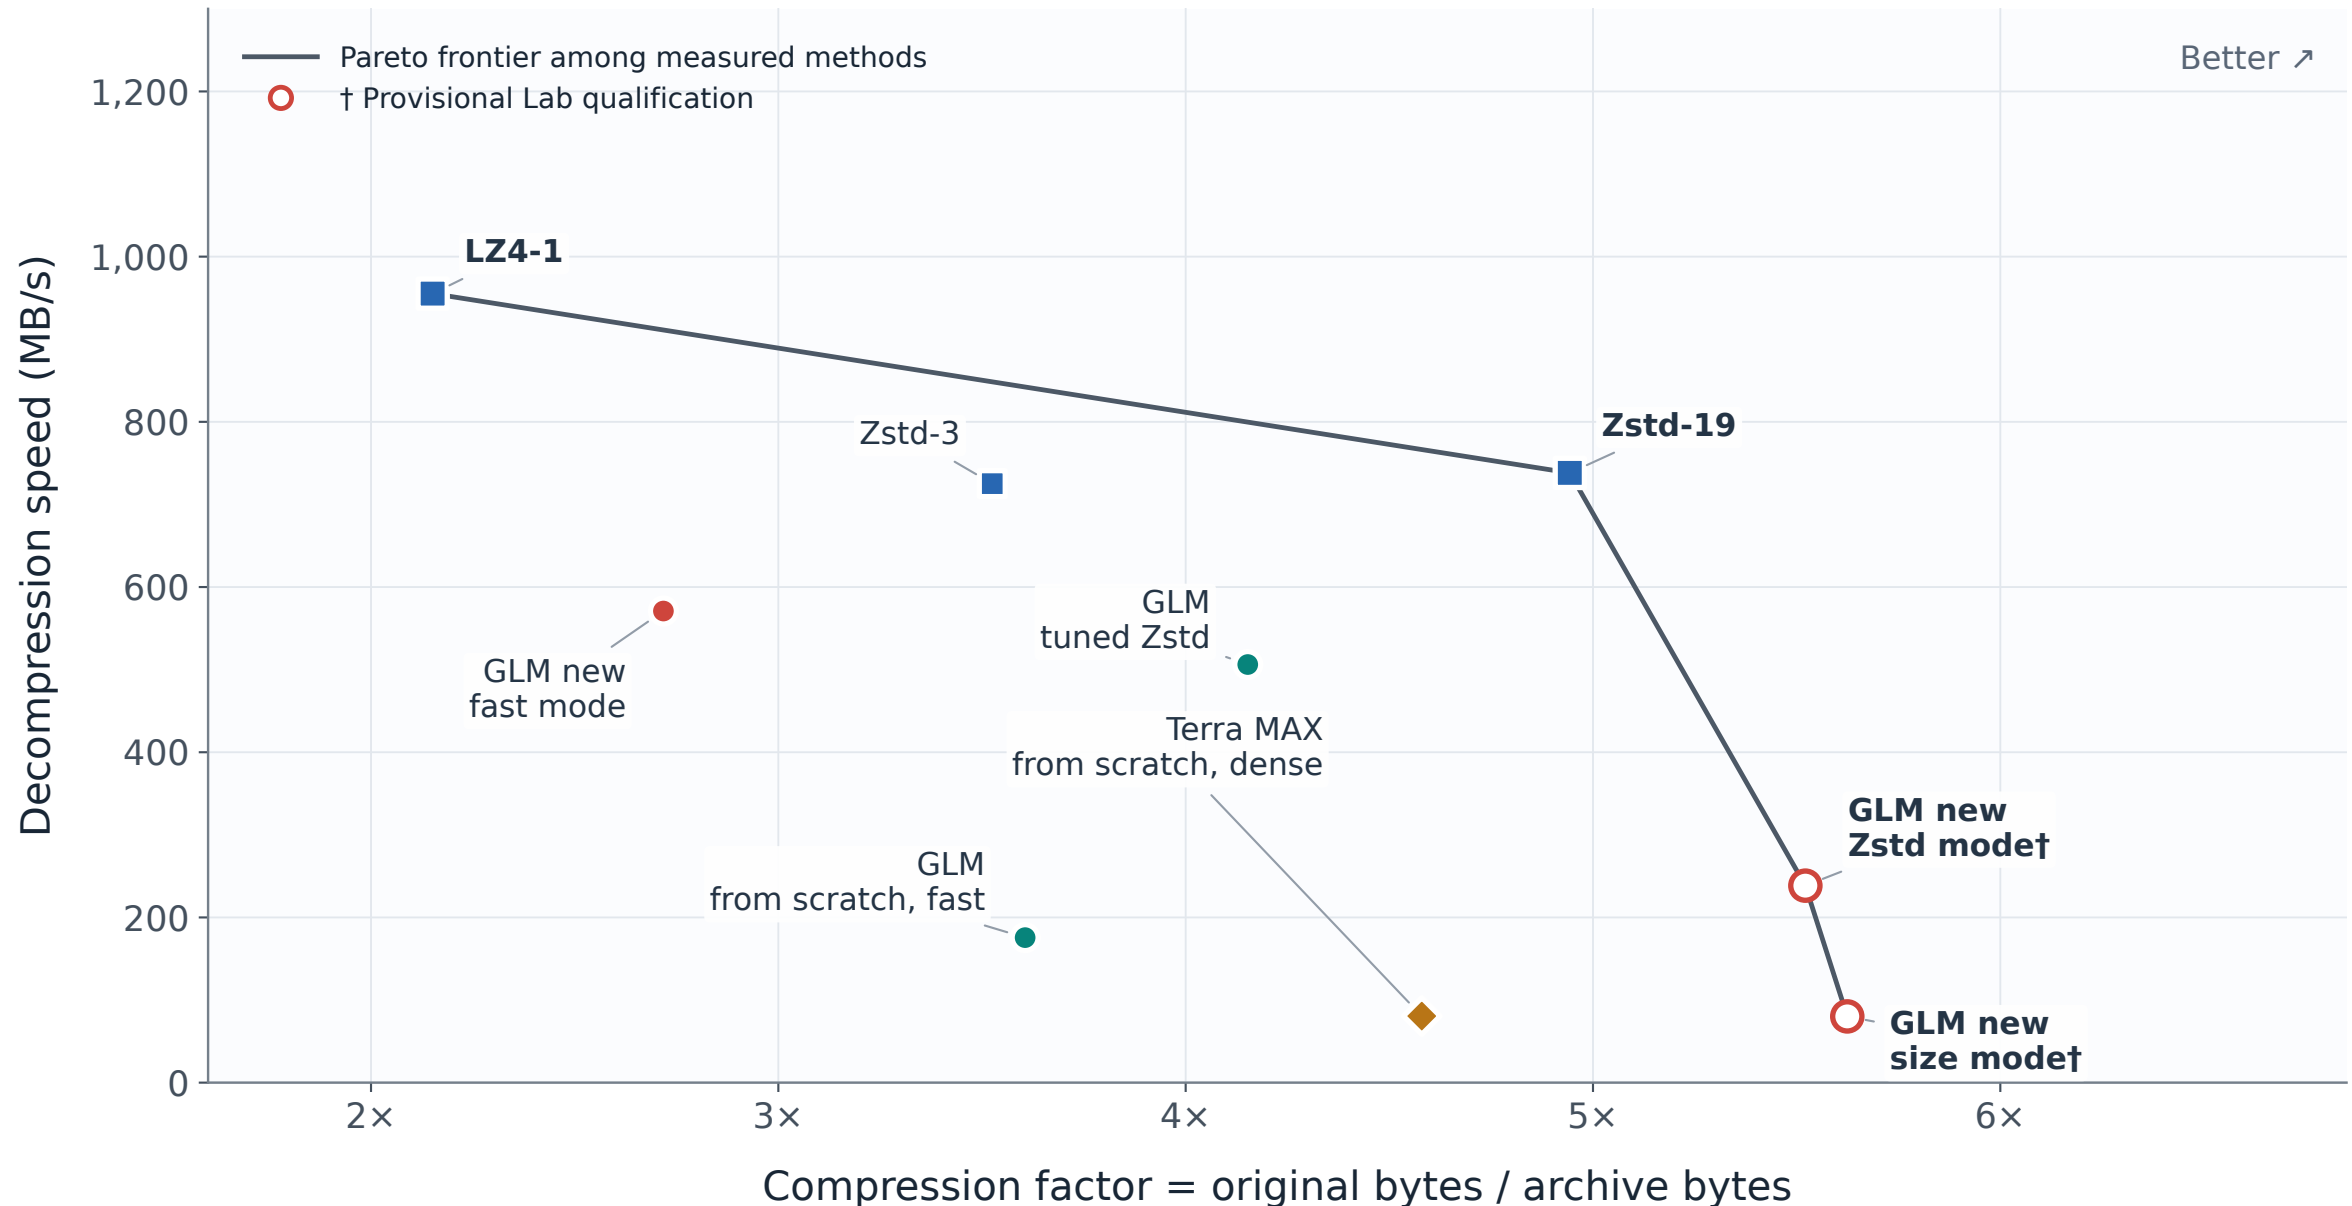

Archive includes framing and online dictionaries; decoder executables excluded.

All points passed byte-exact full-dataset RAM checks. Frontier uses these two metrics only.

Python source

Compression factor vs. decompression speed

Native RAM-to-RAM · 1 CPU core · median of 3 trials · original ≈ 100 MB

Archive includes framing and online dictionaries; decoder executables excluded.

All points passed byte-exact full-dataset RAM checks. Frontier uses these two metrics only.

† Size mode failed a separate streaming gate; Zstd mode did not finish full Lab qualification.
